Education

S.I.E.S (Dr. APJ ABDUL KALAM MEMORIAL) HIGH SCHOOL – Mumbai (2009 - 2021)

SSC : 92.2%

H.V.P.S Ramniranjan Jhunjhunwala College (Science) - Mumbai (2021 - 2023)

HSC: 81.00%

Vidyalankar Institute of Technology (B-Tech Computer Engineering) – Mumbai (2023 - 2027)

Projects

Memory Management Simulator (Segmentation & Paging)

Tech Stack: JavaScript, HTML, CSS

- Created an interactive web-based tool to demonstrate memory management concepts like segmentation, paging, and dynamic memory allocation.
- Built an intuitive user interface enabling real-time simulation and visualization of memory operations.
- Integrated features such as fragmentation detection, allocation monitoring, and graphical display of code, data, and stack segments

Virtual ATM Machine Simulator

Tech Stack: Python, Flask, SQLite

- Developed a secure and intuitive web application simulating key ATM functionalities such as balance inquiry, withdrawal, deposit, and transaction history.
- Incorporated user authentication and session management to ensure secure and personalized access.
- Implemented input validation and comprehensive error handling to enhance user experience and maintain data integrity.

Posture Detector

Tech Stack: Python

- Created a python-based application that helps every individual to maintain a correct posture .
- It detects incorrect posture and provides audio and text message .
- Developed a secure and intuitive web application simulating key ATM functionalities such as balance inquiry, withdrawal, deposit, and transaction history.
- Incorporated user authentication and session management to ensure secure and personalized access.

- Implemented input validation and comprehensive error handling to enhance user experience and maintain data integrity.

Distributed Voting System

Tech Stack: React.js, Nginx load-balancer, PostgreSQL

- Built a distributed, real-time voting system using Nginx load balancing to distribute traffic across multiple servers and ensure high availability under heavy load.
- Implemented database replication to maintain consistent voter and political party data across nodes, improving fault tolerance and system reliability.
- Developed a secure, transparent voting web platform with a React-based responsive UI, featuring real-time vote updates, authentication, and data integrity mechanisms.

Technical Skills

- **Programming Languages:** C,C++,JAVA, Python
- **Web:** HTML, CSS, JavaScript, Bootstrap
- **Database:** PostgreSQL
- **DSA:** Solved 75+ problems on Leetcode
- **Concepts:** Operating Systems, Databases, Software Engineering, Data structures and Algorithms, Distributed Systems

Soft Skills

- Problem Solving
- Communication skills
- Critical Thinking
- Team collaboration
- Time Management
